Best Reman Process Optimisation

1. Describe the product(s)/components that are being processed by your organisation (Max 250 words)

2. Please mark the reman process(es) that was/were optimised:
 - Core Collection
 - Core Sorting
 - Disassembly
 - Cleaning
 - Inspection and sorting of all parts
 - Reconditioning of part and/or replenishment by new parts
 - Product Reassembly
 - Final Testing
 - Other, please specify: _____

3. What were your organisations' top motivations to optimise this/these process step(s)?
 - Better financial transparency
 - Increase cost efficiency
 - Increase product quality
 - Improve capacity
 - Improve core returns forecasting
 - Reduce process times
 - Expand product portfolio
 - Other, please specify: _____

4. Describe the means/actions which were put into place to improve above mentioned processes. (max 200-300 words)

5. How have you measured the impact of your process improvement(s)?
 - Only qualitative measurement so far; no plans to deploy quantitative assessments
 - Only qualitative measurement so far; organisation is deploying a quantitative benchmarking on qualitative dimensions
 - Measured with ad-choc internal benchmarking on some of the performance drivers (e.g. productivity, costs, quality, availability, timeliness of deliver). Comparison with former figures is sometimes missing or not meaningful
 - Measured with regular internal benchmarking on some of the performance drivers
 - Measured with regular internal benchmarking on some of the performance drivers. Value realised and results are compared with external best practices/peer results (e.g. external benchmarks)
 - Other, please specify: _____

6. Describe the results of your reman process optimisation. Include the standard metrics and KPIs used to measure and manage the performance on important drivers (e.g. productivity, costs, quality, availability, timeliness of deliver) Max 200 words.

Send your nomination to rematec@rai.nl with subject 'Nomination'

Best Reman Business Innovation

1. Tell us why your company should be the winner of the Best Reman Business Innovation category.

Provide a non-confidential summary of your business innovation. Max 200 words.

2. What were your organisations' top motivations to develop this reman business innovation?

Explore new geographical markets

Expand to new sectors

Diversify client base

Accelerate growth

Strengthen competitive advantage

Other, please specify:

3. How is the business innovation developed? Please mark your answer

Developed in-house from early stage (e.g. from basic principles, identification of potential applications or proof of concept)

Developed in collaboration with external partners (e.g. current or new supply-chain partners, research organisations, universities, funding bodies)

Developed externally (you will not be eligible for the award)

4. Please provide a brief summary of which organisations were involved and their contributions (max 75 words)

5. In what extent could this innovation be an inspiration for other organisations in the remanufacturing industry? (max 75 words)
